I downloaded it from the python website. I'm trying to do the following: from textrank import TextRank import nltk file_path = "C:/Users/ariosala/Desktop/data.txt" with open(file_path) as f: text = f.read() tokenized_text = nltk.word_tokenize(text) tagged_text = nltk.pos_tag(tokenized_text) graph = TextRank(tokenized_text) for word in tagged_text: for topic, probability in graph.iter_topic_words(word, text=tagged_text): print("TOPIC: {}, PROBABILITY: {}".format(topic, probability)) When i run the code it gives me this error: IOError: [Errno 2] No such file or directory: 'C:\\Users\\ariosala\\Desktop\\data.txt' I'm able to open the text in notepad without issues, so I don't understand why python cannot open it. Could someone help me with this? Thanks. A: The error looks like you can't read the file. You could try open(file_path, 'r') instead of open(file_path, 'w') You may have to check if that file exists before trying to read it. Finally, instead of .txt extension, try file_path.extension and check if it's a plain.txt file or a a1d647c40b
